Kumta, Karnataka - 581332

Professional Summary

BCA student specializing in backend development with internship experience in AI chatbots and WhatsApp automation. Skilled in Node.js, Express.js, MySQL, MongoDB, JWT authentication, and REST API design. Experienced integrating OpenAI API, WhatsApp Business API, Stripe, and Clerk into production-ready systems.

Key Skills

- **Backend Development:** Node.js, Express.js, REST API Design, JWT Authentication, Middleware, Socket.IO
- **Architecture Messaging:** Webhook Integration, MVC Architecture, Redis, Apache Kafka
- **Programming Languages:** JavaScript (ES6+), Python
- **Frontend Development:** HTML, CSS, JavaScript, Tailwind CSS
- **Database Management:** MongoDB, MySQL
- **DevOps Tools:** Docker, Git, GitHub, Postman, Cloudinary
- **Cloud:** Microsoft Azure

Education

Bachelor of Computer Applications

2023 – 2026

Dr. A.V Baliga College of Arts and Science, Kumta (Karnataka University - Dharwad) CGPA: 8.94 / 10

Internship

Web Developer Intern - Sash Info Services Pvt Ltd

Mar 2026 – Jun 2026

- Developed a production-deployed AI chatbot for the Eductrl platform using OpenAI APIs and a RAG pipeline with vector-based document search using Node.js.
- Built an admin panel for chatbot configuration, session monitoring, and staff interaction management.
- Resolved data retrieval issues in the IIFLS AI system by improving context-building logic and implementing web crawling for dynamic knowledge updates.

Projects

WebhookHub

[Project Link](#)

- Engineered a reliable event delivery system with signed payloads, automatic retries using exponential backoff, dead-letter queue handling, and manual replay capabilities to ensure fault-tolerant webhook processing.
- Built a multi-project dashboard with role-based access control, API key management, and real-time delivery monitoring, enabling secure event tracking and live status updates.

Technologies: Node.js, Express.js, React, MySQL, Prisma ORM, Redis, BullMQ, Socket.IO, JWT

WhatsApp Ticketing System

[Project Link](#)

- Built a multi-agent WhatsApp customer support platform with AI-assisted responses and seamless ticket routing to human agents.
- Developed backend APIs for ticket management, messaging workflows, and contact handling using Node.js, Express.js, and MySQL.

Technologies: Node.js, Express.js, MySQL, WhatsApp API

Certifications

- Full Stack Web Development - Skill Up GeeksforGeeks
